

Open Wall Mount L-Shelf Installation Instructions 2298-66002 Revised

Parts List:

Eagle Clip Z Bracket 2" and

Screw #8 X 5/8 PPH

Number of Brackets and Screws varies for length of shelf.

Screws are **NOT** supplied to attach to wall. (Must be long enough to drive into Wall Stud)

Step 1: Screw 2" Z Brackets to back of L-Shelf in two straight lines from side to side in the pre-drilled locations.

Step 2: Locate studs in wall and attach the long Z brackets in two straight lines to match the pattern of 2" clips attached to back of shelf at the desirable height on the wall. It is recommended to attach to every available stud. Top row should be mounted to wall 2 7/8" down from the top of the back panel. The second row should be 9" from top of Z bracket to top of Z bracket. Long Z brackets are 6" less than overall length of shelf to allow adjustment side to side.

60" Shelf Shown
