

Indiana Furniture was one of the first to use an ultraviolet finish on all exposed surfaces—not just the top surface—and to offer **the UV finish as standard on all casegoods and tables series**—not just as an option. UV Advantage finish makes Indiana Furniture a leader in wood finishing, and it's part of Indiana Furniture's continued interest in using cutting-edge technology as well as our commitment to making responsible environmental choices.

CUSTOMER BENEFITS

Clarity

A cured UV Advantage finish magnifies the beauty of our sensational wood finishes and reduces the darkening, aging, and yellowing process of wood furniture that naturally occurs over time. Other topcoats may not protect the wood causing the furniture to age and yellow at a much faster rate.

Durability

Our UV Advantage finish ranks an outstanding five out of five in durability tests. Other topcoat finishes commonly rank three or less.

Hardness

The hardness of our UV Advantage finish makes surfaces less likely to be damaged by abrasions, scratches, water, alcohol, stains, and common chemicals. Our UV Finish performs much higher in this category compared to other topcoats including lacquer and varnish.

Safe Office Environments

Once cured by UV lighting, our UV Advantage finish does not emit irritable toxins, formaldehyde, or solvents into the air. This creates safe work environments within new furniture installations.

Air Pollution

Our UV Advantage finish process greatly reduces hazardous air pollutants, which contribute to smog formation. UV Finish is recaptured over and over again reducing waste material.

Employee Health

Automated finish spray technology and enclosed spray booths eliminate exposure to sprayed chemicals in our factories.
