Technology Made Easy.

Indiana
FURNITURE

In today's technology-driven world, it's critical to have easy access to stay powered throughout the workday. Products with seamlessly integrated technology options, all within easy reach and with clean and easy-to-setup wire management solutions, ensure your employees remain connected and your business continues thriving.

Technology is Ever-Changing.

It seems like technology changes by the minute. And there's no telling what it will look like a year from now, much less next month. However, we do know that keeping employees powered and ready is a must for businesses today, and long into the future.

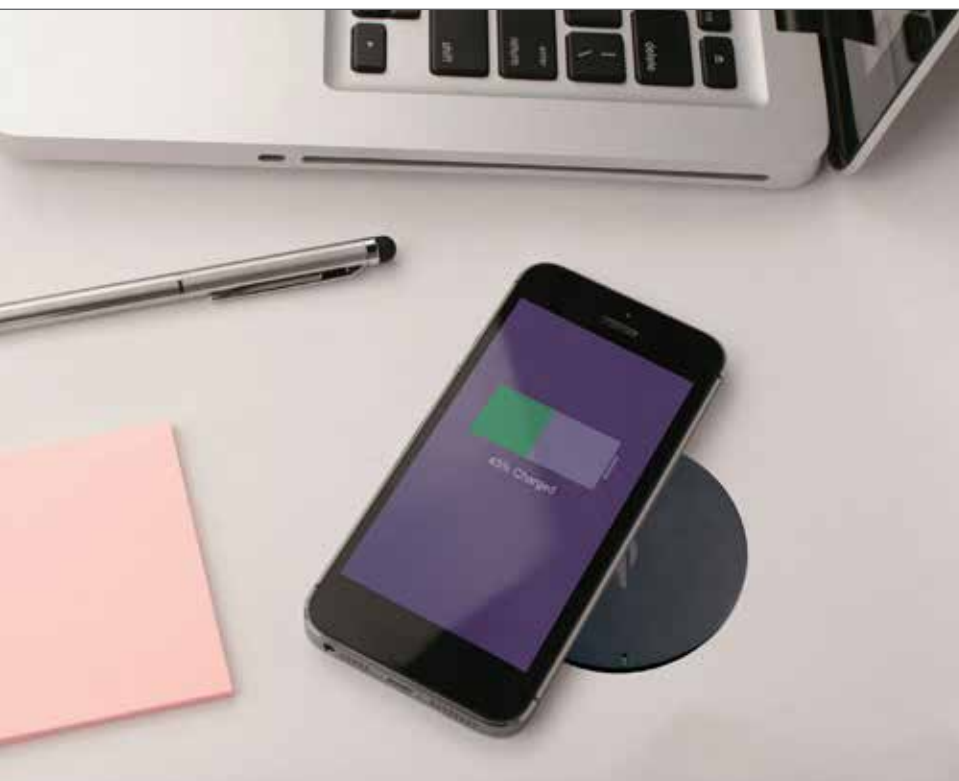

Duo Clamp

Seamless Integration.

Technology is changing the way we work.

Employees want to connect easily and, moreover, instantly. Messing with wires and crawling under surfaces interrupts work flow, causing unnecessary distractions and loss of efficiency. Smart office furniture is simple, yet high functioning to foster connectivity and, thus, productivity and collaboration. It's mission is to link the user with technology through seamless integration of power and USB ports, discrete wire management, and long-term flexibility.

We've Made It Easy.

You don't have to be an expert in technology to easily support technology needs. That's where we come in. From workstations to lounge chairs, we've created a range of smart products that provide intuitive plug-n-play, while keeping any wires at bay.

In other words, we've made it simple for you to look like a technology hero.

Dock 950

Dock 950

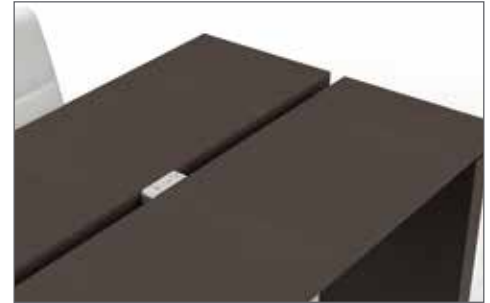

Readily available and intuitive solutions make it simple for users to connect; leaving their focus to the business task at hand rather than worrying about how to power up.

No matter the application, we've integrated smart options across our portfolio, giving you freedom to connect throughout your entire work environment.

Seamless integration can be found across our entire portfolio for technology without distraction.
