## Curve Ganging Assembly Instructions

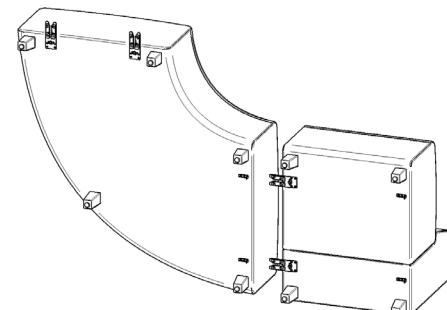

### 1 Determine the desired layout of units.

Curve units are preconfigured from the factory to gang as inside curves. They can be turned and used as outside curves. However, the ganging brackets will need to be reconfigured.

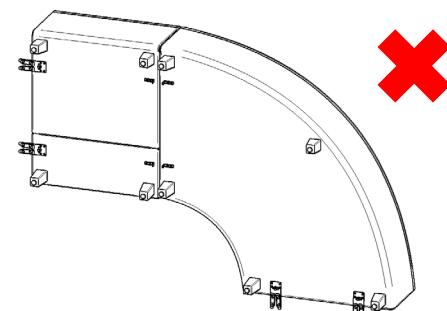

### 2 For curve units that are to be used as inside curves, continue to step 8 on page #3.

For units that are to be used as outside curves, continue to the next page.

✓ Will gang as preconfigured from the factory. Skip to page #3.

✗ Will not gang as preconfigured from the factory. The curve unit will need the brackets reconfigured.

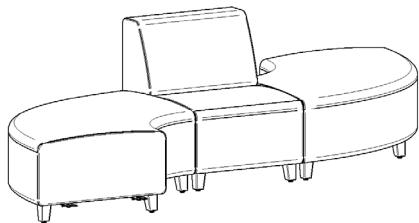

Continue to next page.

*Units should be ganged standing upright. Units shown on their back for clarity.*

Note: Images shown are for clarity purposes only and may not match the unit that you are currently installing.

## Curve Ganging Assembly Instructions

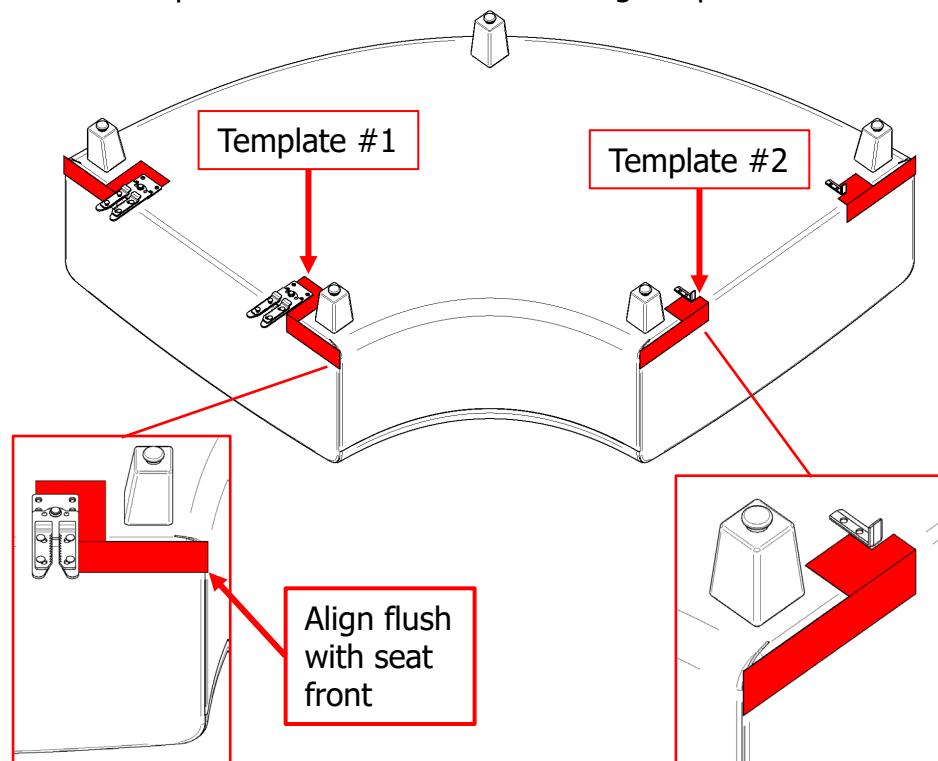

3 Cut out the templates on page #5 & #6.

4 Turn the unit over. Remove all the screws holding on the ganging brackets.

5 Use the paper template #1 for the prong side of the ganging bracket. Fold the template on the fold line. Align the edge of the template flush with the front edge of the seat. Position bracket into the corner of the template & reinstall the screws. Repeat for the other side.

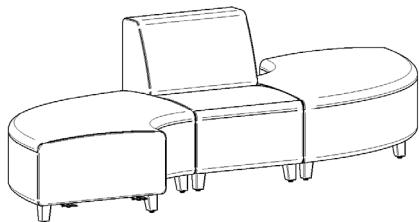

Repeat for the L-bracket side using template #2.

Note: Images shown are for clarity purposes only and may not match the unit that you are currently installing.

## Curve Ganging Assembly Instructions

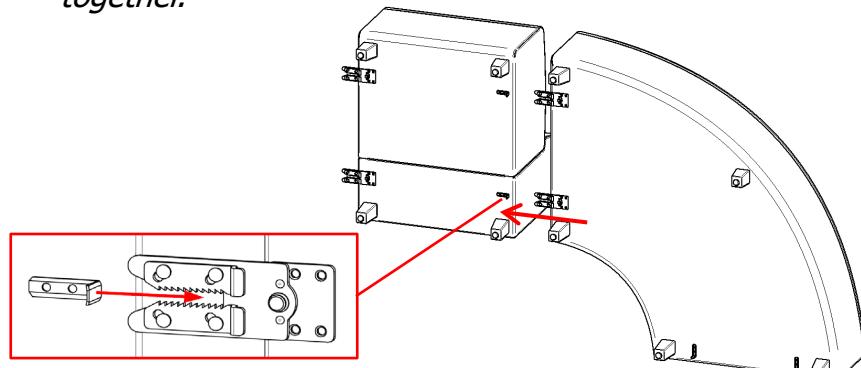

6 Start by folding out the ganging brackets on the unit that is to be ganged to.

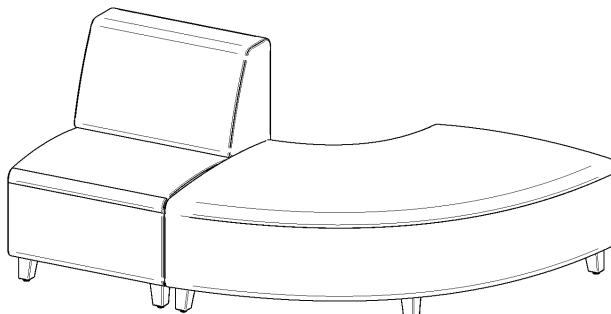

*Units should be ganged standing upright. Units shown on their back for clarity.*

7 Align the 2 units to be ganged together. Push them together until there is no gap.

*The brackets should click as the units are pushed together.*

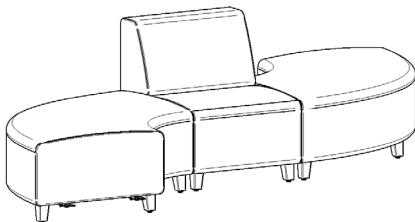

8 The two units should be fully ganged and should not pull apart.

*Note: Images shown are for clarity purposes only and may not match the unit that you are currently installing.*

## Curve Ganging Assembly Instructions

### Disassembly:

- 1 To remove a unit from a ganging application, lift the unit to disconnect it from the adjoining unit. Make sure the adjoining unit stays on the ground.

- 2 Rotate the 2-prong portion of the brackets back in. Disassembly is now complete.

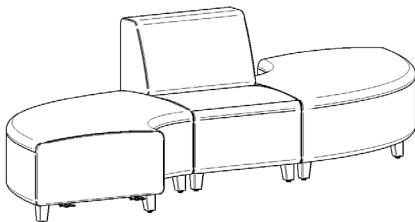

*Note: You will only need to lift the unit approx. 2" to remove the L bracket from the 2-prong portion of the ganging bracket.*

*Note: Images shown are for clarity purposes only and may not match the unit that you are currently installing.*

## Curve Ganging Assembly Instructions

### 2-Prong Template:

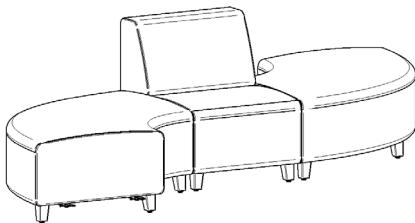

- 1 Verify the 2" measurements on the template measure 2" in size.
- 2 Cut out the template along the thick black lines.
- 3 Fold the template along the dashed fold line.
- 4 Place the 2" side of the template on the side of the seat with the label saying front/back aligned with the front/back edge of the seat.
- 5 Place the 2-Prong Bracket in the corner of the template.
- 6 Install screws into the 2-Prong Bracket. Then template can be removed.

*Note: If multiple units need to be reconfigured it is suggested to transfer this template onto a piece of wood or cardboard.*

*Note: All measurements should be within 1/8" of what is shown.*
