

PURL™ Daisy Chain | Indiana FURNITURE

Modular, Linkable Power Distribution System

PURL™ DAISY CHAIN SYSTEM

The PURL™ daisy chain system adapts to your unique space, allowing you to configure the ideal power setup based on your specific room layout and application.

PURL™ Daisy Chain System includes the following components:

Your choice of Power Units with PURL™ Daisy Chain Plug

PURL™ Daisy Chain Power Infeed

PURL™ Daisy Chain H-Block connects Power Infeed, Power Units, and Jumper Cord

PURL™ Daisy Chain Jumper Cords connects to H-Blocks and Power Units

GREAT SPACES START WITH A PLAN

Before you get started specifying, we have a few helpful recommendations and component guidelines.

We recommend you determine the following:

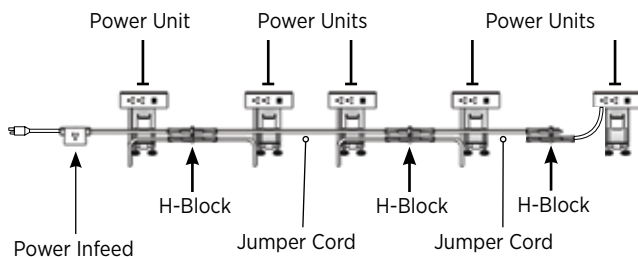

- Setup of the room
- Number of tops needed
- Number of Power Units per top

With multiple Power Unit locations available, understanding how your table tops will be used ensures you specify every component needed to seamlessly stay connected.

Components Guidelines:

- The Power Infeed and Power Units must connect to an H-Block
- When the Power Infeed plugs into the H-Block, two Power Units and a Jumper Cord may be used. Additional H-Blocks can be used with either two Power Units and two Jumper Cords or two Power Units and one Jumper Cord

Five (5) Power Unit System Example:

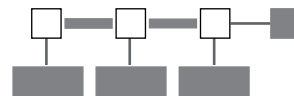

Shown with Duo Clamp. Also available with Duo Air, Duo Bezel and Trio Bezel with PURL™ Daisy Chain Plug

APPLICATION EXAMPLES

SYMBOL GUIDE:

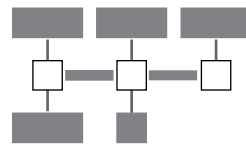

THREE (3) POWER UNIT SYSTEM

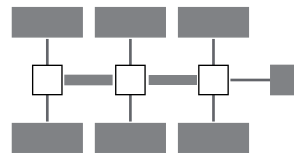

Components:
3 Power Units
1 Power Infeed
3 H-Blocks
2 Jumper Cords

FOUR (4) POWER UNIT SYSTEM

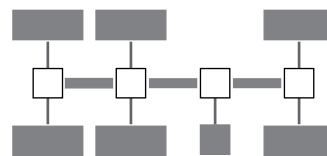

Components:
4 Power Units
1 Power Infeed
3 H-Blocks
2 Jumper Cords

SIX (6) POWER UNIT SYSTEM

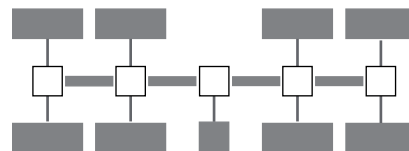

Components:
6 Power Units
1 Power Infeed
3 H-Blocks
2 Jumper Cords

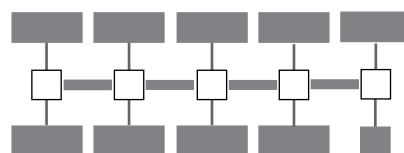

Components:
6 Power Units
1 Power Infeed
4 H-Blocks
3 Jumper Cords

EIGHT (8) POWER UNIT SYSTEM

Components:
8 Power Units
1 Power Infeed
5 H-Blocks
4 Jumper Cords

NINE (9) POWER UNIT SYSTEM

Components:
9 Power Units
1 Power Infeed
6 H-Blocks
5 Jumper Cords
