

DAB

SEATING SOLUTIONS

Indiana
FURNITURE

FUNCTIONALITY MEETS VERSATILITY.

Dab is a collection of stackable metal guest chairs that offer broad functionality and style versatility. With its simple design and light scaling, Dab is ideal for personal and shared offices, teaming and collaborative areas, training and learning spaces, meeting and huddle rooms, break rooms and cafés, and so much more.

Personalize the style and function with:

- Upholstered, Mesh, or Poly Seats and Backs
- Arm or Armless Models
- Casters or Glides
- Aluminum or Black Leg Frame
- Single or Contrasting Fabrics
- Stacks up to 4 High with Casters or 7 High with Glides
- Optional, Easy-To-Connect Ganging Bracket

Dab gives back to the environment by using 70% recycled materials in the seats, backs, and arm frames, and with every Dab chair sold, we'll donate a percentage of the sales to The Common Thread for the Cure, an industry foundation dedicated to the battle against breast cancer.

And Dab is responsible too. It considers the environment by using renewable and recyclable materials, allowing it to achieve indoor air quality and BIFMA level® certifications, and complies with the mechanical standards that focus on safety and durability.

A Palette of Options.

Select from upholstered, mesh, or poly seats and backs. Choose arms or go armless. Roll with casters or opt for glides. Specify a black or aluminum leg frame. Or bring your vision to life with single or contrasting fabrics from a wide variety of graded-in or contract fabrics, vinyls, and leathers. The choice is yours.

And the benefits of Dab stack up. Literally. Dab models with casters stack four high while models with glides stack seven high. And did we mention that Dab gangs? Use the optional, easy-to-connect ganging bracket to keep chairs evenly spaced and in place.

A Little Dab Goes A Long Way.

Sustainability

In alignment with Indiana's deep commitment to the environment, Dab is indoor air quality and BIFMA level® certified, and the collection contributes to USGBC's LEED® and The Green Building Initiative's Green Globes® Programs.

But, more importantly, it's inherently green. Seat, back, and arm frames are made from 70% recycled material to provide a more sustainable chair design which lessens our carbon footprint.

Community

With every Dab chair ordered, we will donate a percentage of the sales to The Common Thread for the Cure, a foundation dedicated to the battle against breast cancer. While most breast cancer charities focus on research, The Common Thread for the Cure Foundation focuses on patient well-being. They support individuals in our industry who are fighting breast cancer by offering helpful financial assistance. To learn more, go to www.commonthreadforthecure.org.

Statement of Line:
