

SPARK

TRAINING + MULTI-PURPOSE TABLE SOLUTIONS

Indiana
FURNITURE

FLEXIBLE FORMATIONS.

From classrooms to meeting rooms, libraries to auditoriums, our Spark multi-use tables couple design with functionality to create flexible learning and collaborative environments. With a variety of sizes, surface materials, and options for flip/nest, mobile, and static bases, as well as accessories like ganging brackets, modesty panels, power units, and lecterns, Spark can be easily configured, and reconfigured, to accommodate changing group sizes and engagement needs.

Personalize the style and function with:

- TFL, HPL, and Veneer Surface Materials
- Static or Flip/Nest Base Options
- Fixed or Hinged Modesties
- TFL, Veneer, and Acoustic Modesty Materials
- Aluminum, Black, and Snow Metal Finishes
- Black and White Casters or Glides
- Ganging Capabilities
- Surface Power Accessories + Chaining

Spark Tables are responsible too. They consider the environment by using renewable and recyclable materials, allowing them to achieve indoor air quality certifications, and they comply with the mechanical standards that focus on safety and durability certifications.

Flip. Nest. Configure. Meet. Repeat.

Spark is not just a pretty face. It goes to work to provide the flexibility you need to create any layout or formation that best suits your meeting, classroom, auditorium, or training needs. And the heavy-duty ganging brackets and pre-drilled tops make it easy to gang tables side-by-side, front-to-front, or side-to-front.

Add surface power, tackboards, marker boards, and tool rails to create a fully functional space that supports all types of presentation styles.

Idea Starters:

24"D Static Table
with Glides

Colors represented are high-resolution reproductions and may vary slightly from the actual product. To order samples, please contact our Customer Service team or order online at indianafurniture.com. Graining and finish colors may vary, yet will continue to complement, across Veneer, HPL, TFL, and Seating products due to the inherent differences of these materials.
