

# THE BEAUTY OF WOOD

understanding the world's  
most important material

a CEU developed by  
Indiana Furniture

## Course Description:

Explore the timeless appeal and unmatched benefits of wood in commercial design with The Beauty of Wood. This course dives into wood's sustainability, biophilic advantages, and versatility, making it the ultimate choice for environmentally conscious and wellness-focused spaces. Learn how responsible harvesting and modern woodworking techniques bring out the best in this renewable material, and discover the unique properties of various wood species. From the U.S. Senate desks to family kitchen tables, wood has been the surface for life's most important moments.

## Course Objectives:

- How wood is a more sustainable material choice than plastic or metal
- How wood is harvested and processed into commercial products
- How various species of wood compare on origin, properties, and application
- How wood furniture impacts the wellness and performance of space occupants
