All textiles shown are 66" wide.

Dye lots may vary slightly from samples shown.

*This term and any corresponding data refer to the typical performance in the tests indicated and should not be construed to imply the behavior of this or any other material under actual fire conditions.

The patterns shown feature a versatile directional appeal. All are illustrated on the card "up the roll". These patterns may also be applied "railroaded" for a unique and equally exciting aesthetic.

Caution: When applying "railroaded" please consider panel heights and the 66" width of these patterns. Always apply in a consistent direction.

---

All patterns are underwriter’s laboratory recognized component fabrics, additional testing of these fabrics is not required on approved panel systems from participating manufacturers or remanufacturers.

The patterns shown are GreenGuard® Children and School Indoor Air Quality certified. These materials can contribute points toward LEED® certification.

### Reduced Environmental Impact

These products are produced using a minimum of 50% recycled fiber.

---
