Indiana Furniture Is Happy To Be Your Work Life Sidekick.

JASPER, Ind. — May 22, 2026 — NeoCon is about more than seeing furniture—it's about understanding how design supports people in real environments. At this year's show, Indiana Furniture's Chicago Design Studio will spotlight furniture with intention: adaptable, intuitive solutions designed as the perfect sidekick to your work life and built to help spaces perform beautifully.

From focused work to collaborative settings, Indiana Furniture creates solutions that work alongside people every day—responding to changing needs with comfort, flexibility, and purpose. That intentional design comes to life at NeoCon through a lineup of new and expanded solutions built to support the way people work, learn, meet, and move today.

Throughout the showroom, visitors can experience Script Lounge, a people-centric collection that brings comfort, personalization, and flexibility to the forefront. Blending freestanding and modular elements, Script supports spaces designed for pause, focus, connection, and informal collaboration—offering the right balance of privacy and openness. Multiple back heights, linear and curved configurations, coordinating tables, and a range of base options make it easy to move from casual to more refined applications.

Workmate Tables show how mobility and intuitive function can support work almost anywhere. Compact, lightweight, and easy to reposition, Workmate is designed for lounge areas, private nooks, classrooms, and touchdown spaces—delivering a convenient worksurface exactly where it is needed most. Quick height adjustment supports easy transitions from sitting to standing, while its minimal footprint and adaptable design help users shift smoothly between solo tasks, collaboration, and in-between moments throughout the day.

A fully functional Learning Center showcases Spark Multi-Purpose Tables, demonstrating how the collection helps dynamic spaces stay organized, adaptable, and ready for what is next. Spark supports quick transitions between activities, layouts, and group sizes with a broad range of sizes, materials, and base styles—including flip-and-nest, mobile, and static options. Accessories such as ganging brackets, modesty panels, power units, and lecterns add even more utility, making Spark a dependable solution for classrooms, libraries, auditoriums, and collaborative spaces.

Indiana Furniture will also feature Catalyst Media + Huddle Tables, created for hybrid and team-based environments. The collection helps shape purposeful meeting spaces for sharing ideas, presenting content, and working more efficiently together. Back panel options—including open, closed, dry erase, and tackboard surfaces—support privacy, organization, and visual collaboration, while integrated power and optional TV mounts make technology easier to access and use.

Building on its product introductions, Indiana Furniture will showcase updates to its CET Designer Extension, reinforcing the company's commitment to making specification faster, smarter, and

easier for designers. Live demonstrations will take place throughout the show, with a dedicated opportunity to connect with CET experts from Configura on Monday, June 8, from 2 p.m. to 4 p.m.

The showroom experience will also include discussions about The Power of Color at 2:00 p.m. on Sunday, and at 10:00 a.m. and 2:00 p.m. on both Monday and Tuesday, inviting attendees to explore how color shapes perception, experience, and the overall feel of a space.

"This year's Design Studio reflects the Indiana Furniture brand—thoughtful, approachable, dependable, and built with personality," said Mike Blessigner, Vice President of Sales and Marketing. "That same spirit shapes how we design and how we work with customers and partners: creating solutions that feel supportive, intuitive, and ready for real life."

NeoCon attendees are invited to visit Indiana Furniture's Chicago Design Studio during NeoCon 2026, June 7–10, at The Mart, 10th Floor, Suite 1042, to meet the team behind the designs, spend time with the furniture, and see how intentional design can become a true sidekick to the workday.
